

AVAILABLE NOW! THE NEW LOCK AND HANDLE SET FOR THE CORTIZO 4700 PATIO

Here at TradeFix we are committed to making our products better and more accessible to our customers; and so we have made the decision to upgrade our patio door lock to the Ingenious Patio full hook lock system.

This means we have also been able to implement the use of the much improved Brisant Secure Sweet Patio Door handle.

This beautiful handle is a modern, sleek, and stylish take on the classic and is available in all the colours you know and love as well as some more niche offerings.

As of March 1st 2024 we will be using this lock and handle combination as standard on all Cortizo 4700 inline sliding patio orders and quotes, unless requested otherwise.

We will still be stocking the existing patio door lock and handle combination for all customers that request this. If you wish to have the old lock and handle set as a standard. Then please contact us in writing so that we can program this into our system for you.

The fantastic sweet range of handles is available in a more varied palate of colours and finishes than we have been able to offer before. Colours such as Chrome, Satin Nickel, and even Rose Gold are ready for your selection!
